

PRACTICAL ROCK ENGINEERING	Pages
1. Preface	13
2. What is rock engineering?	31
3. Intact rock strength	30
4. Shear strength of discontinuities	14
5. Rock mass properties	42
6. In situ and induced stresses	15
7. When is a rock engineering design acceptable?	26
8. Structurally controlled instability	12
9. Factor of safety and probability of failure	13
10. A slope stability problem in Hong Kong	15
11. Rock slopes in civil and mining engineering	18
12. Rock mass classification	23
13. Tunnels in weak rock	21
14. Design of large underground caverns	29
15. The Rio Grande project – Argentina	13
16. Rockbolts and cables	23
17. Model to demonstrate how rockbolts work	8
18. Shotcrete support	15
19. Tensile Failure and spalling	30
20. Analysis of rockfall hazards	25
21. Blasting damage in rock	9
Total	432
