

Accepted Abstracts for the Rocscience International Conference 2027

Abstract ID	Title	Authors
2	Linear Elastic Fracture Mechanics Applied to Rock Slope Stability Analysis Using the CVBM Model	Boada Becerra, C., Lima Rasmussen, L.
3	Explainable Engineering Decision Intelligence for Mining	Emery, J., Pavlicevic, B.
4	Back-Analysis of Settlement Behavior in Hydrostatic Tank Foundations Using 3D Finite Element Modeling	Signorini Dias, R., Albuquerque, P., Rios, E., Feitosa Monteiro, F.
8	Operational Geomechanical Monitoring Applied to Slope Stability Management in Open-Pit Mining	Astorga, F., Mazzeo, N.
10	Integrating Seismic Monitoring and Numerical Modelling for Risk-Informed Ground Response Analysis in Deep-Level Underground Mining	Poggenpoel, J.
11	Behavior of Driven Steel Piles for Solar Energy Infrastructure: Comparison Between Field Measurements, Semiempirical Predictions, and Computational Analysis in Brazilian Tropical Soils	Rios, E., Feitosa Monteiro, F., Albuquerque, P., Viana Kauer, L., Moreira Santos, D.
12	Hydro-Mechanical Assessment of Rock and Lining Stability in Fractured Rock Tunnelling	Moallemi, S., Bazargan, M.
14	Geological–Geotechnical Assessment and Simulation-Based Evaluation of Discontinuity-Controlled Rockfalls for Stabilization Design Along the Eruh-Fındık Road Cuts	Oktay, M.
15	A Weighted Least Squares Correction for the Linearized Hoek-Brown Criterion for Intact Rock	Sepulveda Zamorano, J.
16	3D Finite Element Assessment of Shaft Base Stability Under Hydraulic Uplift	Moallemi, S., Piazzetta, G., Azami, A., Ko, B.
17	Automated Calibration of Slope Finite-Element Models Using Bayesian Optimization	Mitelman, A., McQuillan, A.
19	FEM Based Assessment of High Dump Stability for Void Backfilling: Evaluation of Crack Development, Safe Repose Angle, and Operational Buffer Distance	Naufal, M., Wicaksono, E., Pasubondo, B., Utomo, S.
21	Blast Design Optimizer (BDO)	Martinez Barrón, D., Cardenas, J.
24	Interoperability Between Parametric Geometric Design and Geotechnical Analysis for the Safety Assessment of a CFRD Dam	Medrano Chui, W.
26	Anisotropy-Aware Machine Learning Framework for Rock Mass Damage Class Prediction in Deep Underground Mines: A Case Study in Canada	Hazrathosseini, A., Godwill Adubi, O., Taheri, A.
28	Evaluation of Stress Relief Factors in 2D Numerical Models Through Comparison with a 3D Tunnel Excavation Analysis: A Case Study of Excavation in Residual Soil	Farias dos Santos, M., Lavoie, F.
29	Reliability-Aware Assessment of Deep-Excavation Effects on Adjacent Structures Using 3D Deformation Fields	Florczak, M.
30	Beyond Static P–Y: Analytical and Machine-Learning Assessment of Kinematic Seismic Pile Bending Absent from Winkler-Based Commercial Design Tools	Khosravi, M.
31	Three-Dimensional Stability Assessment of a Waste Dump Using Leps Nonlinear Shear-Strength Envelopes	Guimarães de Carvalho, L., Ribeiro Bueno, Z., Bretas, T., Moallemi, S., Furtado Cota, T., Silva, A.
32	Numerical Analyses and Geotechnical Challenges for the Design and Reconstruction of a Reinforced Motorway Embankment Collapsed Following an Extreme Debris Flow	Bella, G., Falanescas, M., Gianelli, F., Sala, E., Bettoni, D.

34	Assessment of Safety Factor Variability in a Heap Leach Pad with Multiple Interfaces Using Two-Dimensional and Three-Dimensional Analyses Based on the Limit Equilibrium Method	Rosales, V., Paico, M., Neyra, L., Oropeza, A., Parra, D.
35	Estimation of the Disturbance Factor (D) in an Open-Pit Slope	Larenas, B.
37	Anisotropic Spatial Variability in Slope Stability Analysis Using the Random Limit Equilibrium Method: A Complex Case Study	Sy, L., Javankhoshdel, S.
38	Integrated Soil Liquefaction Analysis in Slope Stability Using Limit Equilibrium Surface Discretization	Sy, L., Javankhoshdel, S.
39	Enhanced Seismic Analyses in Slope Stability Utilizing 1D Seismic Response Data	Sy, L., Javankhoshdel, S.
40	Application of the Anisotropic Linear Strength Model to the Stability Assessment of Open-Pit Slopes	Guimarães de Carvalho, L., Bretas, T., Ribeiro Bueno, Z., Moallemi, S., Neto, A.
41	3D Back-Analysis of a Slope in Juiz De Fora, Brazil	Guimarães de Carvalho, L., Bretas, T., Ribeiro Bueno, Z., Moallemi, S., Neto, A.
42	Application of the Scaled Span Method to the Stability of the Lava Tube of the Corona Volcano. Lanzarote. Spain	Jorda Bordehore, L., Briones, J., Galindo, R., Benrabah, A.
43	AI Based Permanent Displacement Risk Assessment Tool for Critical Infrastructure: Evaluation of Fuzzy-Subsystems of Ongoing Research	Adanir, E.
45	Assessment of the TsT _s Ts- and VsV _s Vs-Based Site Classification and Regional Design Spectra Proposed in the New Mexican Model Code	Flores, F.
46	Assessment of the Ts- and Vs-Based Site Classification and Regional Design Spectra Proposed in the New Mexican Model Code	Flores, F., Gonzalez, Z., Arriagada, J., Supo, M.
48	Abstract: AI Enhancement of Critical Hazard Control Verification Process	Guy, G., Sjoberg, M., Cobian, J.
49	Influência Do Modelo Constitutivo Na Resposta Geomecânica Da Barragem B1 Sob Condições Favoráveis à Liquefação Estática	Jose, L., Caroline Miranda, T.
50	Proposed Methodology for 3D Numerical Slope Modeling Based on the Compliance of a Technical Audit of Rock Mechanics Using Rocscience Software	Pozo, R.
51	AI-Driven Prediction of Seasonal Soil Suction in Instrumented Tropical Pavement Subgrades Using Climate and Field Sensor Data	Dzikunu-Bansah, N., Ampadu, S., Owusu-Nimo, F., Ayeh, F., Charkley, F.
52	Comparison of Drainage Simulation Methods in 2D Numerical Analyses of NATM Excavations	Farias dos Santos, M., Soares, V., Mariani, M., Akamine, I., Yamaguti, P.
53	From Archive to Intelligence: The Transformation of Legacy Geotechnical Records Into AI-Ready Digital Assets for National Water Infrastructure Delivery in South Africa.	Mgabisa, N.
55	Experimental Assessment of Geogrid-Reinforced Sand Under Rockfall Impact	Khajuria, A., Sharma, A., Halder, P., Bhowmik, R.
56	Evaluation of Blast Signature Hole Analysis with Newmark Method for Blasting Risk Control at Undercutting KGU Pit	Utomo, S.
57	Optimization of Hypothetical Breach Studies in Waste Rock Dumps: A Comparative Volume Analysis Between 2D and 3D Models	Rigatto, I., Faria, L., Campos, A., Machado, I., Torres, M.
59	Comparative 3D Geomechanical Analysis of Boundary Element (Map3D) and Finite Element (RS3) Methods for Large-Scale Underground Mining:	Barbosa Amaral, J., Gritti, R.
60	Separating Machinery-Induced Apparent Deformation from True Rock-Slope Movement in Slope Stability Radar Data: A One-Class SVM Case Study from Jwaneng Mine, Botswana	Dintwe, T., Pone, I., Saubi, O., Barei, O., Rekopanye, C., Gabanakgosi, K.
61	In-Situ Stress Estimation Via Overcoring and Its Impact on 3D Finite Element Modeling:	Barbosa Amaral, J., Matos, A., Barrera, V.

62	Rockfall Model: From Field Calibration Until Its Use to Risk Assessment	Maria, B., Lima, D., Bretas, T.
63	Rock Slope Stability Analysis at Fazenda Brasileiro Mine	Canabrava, R., Souza, M., Papa, R.
64	Large Diameter Tunnelling in Poor Rock Mass: Challenges & Improvised Support Strategies for Main Access Tunnel-1 of Dibang Multipurpose Project, Arunachal Pradesh India	Kumar, N., Singh, A., Purushan, A.
65	Development of a Constitutive Model for Simulating the Time-Dependent Creep Behavior of Shotcrete	Zapf, D., Sefene, S., Körner, F.
66	Three-Dimensional Seepage and Physical Stability Analysis for the Raise of High-Altitude Tailings Dams: A Case Study of a Major Storage Facility	Valdivia Carbajal, J., Pérez, F., Sierra, J., Llamocca, J.
67	Three-Dimensional Stability Analyses for Critical Failure Surface Definition in Hypothetical Failure Studies of Waste Rock and Tailings Co-Disposal Facilities	Machado, I., Faria, L., Rigatto, I.
68	Overall and Internal Design of Geosynthetic Supports for Retaining Walls Using Optimization Algorithms	Salvalaggio, C., Javankhoshdel, S.
69	Intelligent Search and Surface Altering Optimization: The Future of 3D Limit Equilibrium Analysis – a Case Study	Salvalaggio, C., Javankhoshdel, S.
72	Comparison of Stress Distribution in Settle3 with 3D FEM Results from RS3 for Different Loading Geometries	Al-Mufti, A., Chaudhry, A.
73	Fluid Weakening and Time-Dependent Deformation in Porous Sandstone	Baud, P., Mammadov, S., Penkov, G., Wong, T.
74	Comparative Evaluation of Soil Failure Envelopes Using Power Curve Models for the Probabilistic Stability Analysis of a Waste Rock Dump	Altoé Bissoli, I., Santos, G., Mendes, H., Duarte Azevedo, F.
75	Raster Scan Algorithms for Zoning of Soil Media for Slope Stability Analysis	Al-Mufti, A.
76	Remote Structural Mapping Using ShapeMetriX at an Open-Pit Mine in Minas Gerais, Brazil	Papa, R., Canabrava, R., Souza, M.
77	Back Analysis of Landslide Case Studies Using Gaussian Process Regression	Kazimierczak, M., Corkum, B., Azami, A.
78	Implementation of Autoregressive Models to Predict Groundwater Level Variations And Control the Safety Factor of Slopes in the Stability Analysis of Tailings Storage Structures and Landfills Preventing Critical Situations with the Integration of Geotechnical Simulation	Ernesto, M.
79	Preliminary Consideration of Structural Anisotropy in Open Pit Stability Analysis	Milli, C., Santos Salgado, S., Augusto Rocha de Assis, T., Marques, E., de Rezende Tammerik, G., Amaral, A.
81	Digital Structural Mapping in Underground Mining Using Colored Point Clouds and Georeferenced Orthophotos	Martins, H.
82	Digital Structural Mapping for Dilution Reduction in Narrow-Vein Underground Gold Mining	Martins, H.
83	Bridging AI Automation and Engineering Judgment: A Case Study in Stone Column Settlement Analysis Using RSInsight	Chai, S., Gonzalez, L.
84	Between DIPS and RocSlope3D: Kinematic Analysis of Rock Slopes Using Systematic Panels	Monticelli, J., Cacciari, P., Assunção Gontijo, A.
85	Bench-Scale Stability Analysis in Open Pit Mines	Ribeiro, G., Nakamura, M., Assis, T., Salgado, S.
86	Influence of Rainfall Infiltration on the Design of Basal Geosynthetic Reinforcement for Embankments Over Soft Soils	Ardila, L., Maturano, M.
88	AI-Enhanced Ground Support Performance Assessment for Deep-Level Hard Rock Mining	Sabao, A., Matshona, P., Chibaya, H.

90	Predictive Stability Modelling of Deep Underground Mine Excavations Under Geological and Stress Uncertainty Using Artificial Intelligence and Probabilistic Geomechanics	Sabao, A., Matshona, P., Chibaya, H.
91	Engineered Geosynthetic Backfill Systems for Ground Support and Stability Enhancement in Deep Underground Mines	Sabao, A., Matshona, P., Chibaya, H.
92	Fail Safe Protocol As an Integrated Geotechnical Risk Management Based on Failure Back Analysis Histories: Case from Indonesia Open Pit Mining	Rachmat Putra, R., Nadzarudin, H.
93	Comparative Assessment of Soil Strength Envelopes Using Power Curve Models for Probabilistic Stability Analysis of a Waste Rock Dump	Altoé Bissoli, I., Santos, G., Mendes, H., Duarte Azevedo, F., Silva, W.
94	Numerical Modeling of Long-Term Settlement Behavior Using the Soft Soil Creep Model	Argentieri Mariani, M., Noronha, M., Soares, V., Akamine, I., Yamaguti, P.
95	A 3D Geological and Geotechnical Model for Reconstructing Chromite Seam Continuity in a Structurally Disturbed Sector of the Great Dyke, Zimbabwe	Chibaya, H., Sabao, A., Matshona, P.
96	Random Forest Classification of Geotechnical Domains in a Heterogeneous and Structurally Disrupted Lithium-Bearing Rock Mass	Chibaya, H., Sabao, A., Matshona, P.
97	Extreme Rainfall Events' Influence on the Stability of Weathered Slopes and Its Implications for Pit Slope Design and Operational Ground Management Plans: An Open Pit Mine Case Study from the Democratic Republic of Congo	Kuppusamy, V.
98	An Integrated Geological, Structural, and Numerical Modelling Approach for Geotechnical Redesign of Old Nickel Mine Workings at Trojan Mine, Zimbabwe	Chibaya, H., Sabao, A., Matshona, P.
99	New Approach for Evaluation of Equivalent Mohr-Coulomb Parameters for Design of Embedded Retaining Walls in Rock Mass	Phakade, A.
100	Comparison Between Probabilistic and Deterministic Analyses for Geotechnical Safety Assessment of a Waste Rock Stack in the Iron Quadrangle, Brazil	Figueiredo Cezar, B., Nascimento Pelizzoli, L., Dalvi dos Santos, M., De Bona Becker, L.
101	Numerical Back Analysis of Rock Failure in Tomb WV22 in Thebes for Preservation Planning	Honegger, I., Perras, M., Ziegler, M., Khan, U., Nishiska, A.
102	Parameter Definition for Rock Mass Stability Analysis	Waszak, L.
104	Influence of Undrained Foundation Behavior on the Probability of Failure of Earth Dams Through Probabilistic Three-Dimensional Modeling	Gabriel, G., Ribeiro, B., Faria, L., Cezário, J.
105	Hydro-Mechanical and Seismic Assessment of High-Pressure Concrete Tunnel Plugs in Fractured Rock Masses	Arriagada, J., Donoso, P., Villarroel-Ortega, J.
106	Stress-Strain Behavior Assessment of a Waste Rock Dump in the Iron Quadrangle by Numerical Modeling and Geotechnical Instrumentation	Nascimento Pelizzoli, L., Figueiredo Cezar, B., Vieira Pontes, C., Scoralick Gontijo, J., Martins Lopes, P., Dalvi dos Santos, M.
107	Implementation of Randomized Shear-Wave Velocity Profiles in RS seismic for 1D Liquefaction Assessment: A Case Study from Saguenay, Eastern Canada	Hossain, A., Saeidi, A., Salsabili, M., Nastev, M., Suescun, J.
108	Numerical Modeling of Shallow Tunnels in Non-Cohesive Soils	Cabral, C., Marques Jr., A., Durand Farfan, A.
109	Sustainable AI for Engineering Simulation: Evaluating Locally-Hosted LLMs Against Cloud-Based Alternatives	Chai, S., Hashash, Y., Yang, B.
112	Dynamic Fracturing in Stressed Underground Rock Masses: Mechanisms, and Modelling Approaches- a Critical Review	Matshona, P., Sabao, A., Chigwede, C.
113	Numerical Evaluation of Static and Seismic Performance of Geosynthetic Reinforced Soil Integrated Bridge System	Ardila, L.
114	Explainable AI-Assisted Optimization of Stope Stability in a Shallow, Structurally Controlled Mine	Matshona, P., Sabao, A.

115	Artificial Intelligence As a Support Tool for the Assessment of Parametric Dam Stability Analyses	Karoliny, J., Lima Ferreira, R., Claudia Pereira, L., José da Silva Machado, H.
116	Uniaxial Compressive Strength Prediction from Drilling Parameters: 3D Geomechanical Modelling at the Pit	Ribeiro, M., Reis de Lima, D., Ranielle Martins dos Santos, D., Maria Cruz Fernandes, B.
117	Dynamic Optimization of Catchment Berm Maintenance in Open-Pit Mining Using RocFall 3D	Marin, P., Quispe, N.
118	Influence of Permeability Variability on Seepage Regime and Tailings Dam Stability	Karoliny, J., Lima Ferreira, R., Claudia Pereira, L., Nascimento Brandao, D., Cunha, L.
119	Integrating Laboratory Testing and CPTu for the Assessment of Mine Tailings Liquefaction Susceptibility	Bispo, E., Gabriel, G., Rodrigues, S., Oliveira, S.
120	Integrated Empirical and Numerical Assessment of Stope Stability at Old Nic Mine, Zimbabwe	Matshona, P., Hove, S.
121	Development of an AI-Driven Predictive Safety Management System for Fall of Ground Hazards in Underground Mining: A Case Study of Blanket Mine, Zimbabwe	Matshona, P., Nhemachena, N.
122	Assessments of Continuous Fracturing and Groundwater Depressurisation in Sublevel Mining Operation with Complex Ground Conditions- Case Study of X Mine	Matshona, P., Maswaya, H., Chigwede, C.
124	Rethinking Underground Mine Pillar Design: A Systems-Based Structural Model of Footwall-Pillar-Hanging-Wall Interaction Near a Footwall Fault	Matshona, P., Ndlovu, S.
126	Three-Dimensional Individualization of Rock Blocks from SfM Photogrammetry: Gains in Instability Identification on Railway Corridor Slopes	Schwenck Galvão, M., Côrrea Marcellino, L., Nascimento Jr, M., Duque Ribeiro, R., Marques, E.
127	Comparative Assessment of Constitutive Models, Numerical Platforms, and Geological Variability in Underground Rock Excavation Analysis	Rony Pinedo Grandez, J., Diógenes Costa, D., Linhares Fernandes Filho, F., Rodrigues de Oliveira, M.
128	Comparative Evaluation of Axial KDE and Mean Shift for Voxel-Based Structural Characterization from Open-Pit Bench Mapping	Contreras, A.
129	Discrete Fracture Network Models to Move Beyond Rock Mass Classification	Yang, B., Dogan, Y., Elmo, D.
130	Influence of Discontinuity Mapping Coverage on Rock-Slope Kinematic Assessment	de Amorim Nitsche, G., Abrão Zeni, M., Penido, H., dos Santos Rocha, L.
131	Sensitivity of Rockfall Fragmentation to Slope Geometry in 3D Simulations	Guccione, D., Kundu, S., Huang, Z., Giacomini, A., Buzzi, O.
132	Unlocking Additional Reserves Through Geotechnical Intelligence: The Phase 10 Optimization Case Study at Mina Justa	Quispe Coaquira, N., Marin, P.
133	Comparative Analysis of Methods for Evaluating the Bearing Capacity of Reinforced Soil Walls Adjacent to Slopes	Rodríguez Delgado, G., Rodríguez Delgado, G., Berrospid Aguilar, N.
134	Investigating the Impact of Defects on Brittle Rock Failure Using a 3D Continuum Grain-Based Modelling Approach	Chen, B., Bahrani, N.
135	Global Stability Analysis of Embankments on Soft Soils Improved with Geosynthetic-Encased Granular Columns	F Schmidt, C., Fuentes, L., Ardila, L.
136	Development of an Advanced Anisotropic Model for Limit-Equilibrium Analysis	Cylwik, S., Javankhoshdel, S., Sy, L.
137	Comparative Assessment of Modeling Approaches for Pile-Reinforced Slopes	Furtado, T., Bretas, T., Ribeiro Dib, T., Guimarães de Carvalho, L., Guimarães, P., Ribeiro Bueno, Z., Cabral, G.
138	Can Machine Learning Generalize Hardening Soil Parameters Beyond Its Training Domain? Evidence from Brazilian Soils	Castelo Branco, H., Nascimento Oliveira, T., Jesus, A.

139	Iterative Soil-Structure Interaction Analysis of an Industrial Raft on a Heterogeneous Fill Platform	Castelo Branco, H., Nascimento Oliveira, T., Jesus, A.
140	Statistical Calibration of Pile Resistance Predictions Using Static and Dynamic Load Tests and Nonlinear Load-Transfer Analysis	Castelo Branco, H., Nascimento Oliveira, T., Jesus, A.
141	Effect of Spatial Foundation Heterogeneity on the Stability of Geosynthetic-Reinforced Soil Structures	Ardila, L., Javankhoshdel, S.
143	Numerical Approaches for Analysing the Propagation of a Failure in a Tailings Pile: A Comparison Between the MPM and Ballistic Methods	Zeidler, G., Zingano, A., Cordova, D.
144	Development and Verification of Multilayer Backfill Analysis Framework for RSWall	Saghari, S., Javankhoshdel, S.
145	Transient Numerical Analysis of the Expansion of an Existing Road Embankment on Soft Soil	Cavalcanti, M., Amaral, N.
146	Influence of Sewage Infiltration on Slope Stability	Cavalcanti, M., Gomes, I., Mendonca, M., Nahas Ribeiro, W.
147	Three-Dimensional Finite Element Analysis of Stress in a Concrete Gallery Inside the Tullaroop Dam	Cavalcanti, M., Nogueira Rodrigues, G.
148	2D Numerical Analysis Convergence and Confinement Methodology for Tunnels	Cavalcanti, M., Nahas Ribeiro, W., Gomes Moreira, C.
149	Longitudinal Profiles of Radial Displacements in Deep Tunnels Obtained from Empirical Methods and Three-Dimensional Numerical Analyses	Cavalcanti, M., Nahas Ribeiro, W.
150	Quantitative Back-Analysis of a Rockfall Event Using Impact Footprints	Xie, A., Telfer, J., Huang, Z., McQuillan, A., Li, B.
151	Making Slope Risk Visible: A Digital Twin Approach to Managing an Inter-Ramp Wedge at One of the World's Wettest Mines	Montai, M., Haru, C., Jacobsen, C., Michelini, A.
152	A WMO-Based Layered Framework for AI-Ready Early Warning Systems in Tailings Dam Risk Management	Carlini Rego, T., Brum, B.
153	Definición De Fórmulas Analíticas Dirigidas a Estimar El Factor De Seguridad De Un Pilar Entre 2 Excavaciones.	Martin, W.
154	A Geotechnical Decision Solution for Real-Time Risk Management in Tailings Dam Monitoring	Brum, B., Carlini Rego, T.
155	A Calibrated Grain-Based RS3 Model for Simulating Brittle Failure in Granite Under Laboratory and in Situ Loading Conditions	Poorakbar, A., Corkum, A., Bahrani, N., Moallemi, S., Azami, A., Yacoub, T.
156	Numerical Simulation and Validation of Halite Creep Behavior Using a Burgers Rheological Model and an Automated RS2 - Python Framework	Barboza, R., Cavalcanti, M., Moura, M., Nahas Ribeiro, W., Jordan Ibanez, G.
157	Finite Element Assessment of Dynamic Ground Response to Seismic Loading in Underground Excavations	Ko, B., Li, B., Moallemi, S.
158	360-Degree Imaging for Geotechnical Dam Inspections: Enhancing Visual Documentation and Traceability	Karoliny, J., Claudia Pereira, L., Cunha, L., Nascimento Brandao, D., Cristina Silva, F.
159	Physics-Informed Neural Networks and Digital Twins for Assessing Hydro-Mechanically Coupled Degradation in Concrete Hydraulic Infrastructures	Asres, H.
160	Regression Models and Response Surface Methodology for Global Stability Assessment of Soil-Nailed Walls	Villalobos Cifuentes, S.
161	3D-LEM Physical Stability Assessment of a Coarse Granular Material Slopes	Villalobos Cifuentes, S.
162	Predicting the Soil-Water Characteristic Curve of Chilean Tailings from Index Properties Using Physics-Informed and Explainable Machine Learning	González Isea, G., Carrasco Cisterna, S., Monje Robles, C.

163	Rigid Body Damping Mechanics for 3D Rockfall Simulation: A Validation Study	Adams, S., Liu, T., Singh, A., Corkum, B., Yang, B., Elmo, D.
164	Physics-Informed Neural Networks for Soil Parameter Identification from Sparse Pile Strain Measurements	Vahab, M., Shahbodagh, B., Haghighat, E., Khalili, N.
165	From Prediction to Practice: An Integrated Geotechnical Approach to Traversing a Major Fault with a Large-Diameter Vertical Shaft	Netshivhazwaulu, N.
166	From Rock Mass Characterisation to Open Pit Slope Stability Assessment: An Integrated Geotechnical Approach	Tlektessov, A.
167	Integrating Limit Equilibrium and Finite Element Back-Analysis of Earthquake-Induced Slope Failures in the Saguenay Region, Eastern Canada	Abed, M., Saeidi, A., Chesnaux, R.
168	Technical Overview of De-Characterization in Brazil	Dantas, P., Ladeiras, J.
169	2D Slope Stability Analysis in Open-Pit Mines: A Comparative Approach Between Software.	Dantas, P.
171	Hydromechanical Modeling of Rock Masses with Discrete Fracture Networks	Jameei, A., Pietruszczak, S., Azami, A.
172	Advanced Stochastic Slope Stability Workflows in Slide2 Through Python Automation	Xavier, F., Torrico Siacara, A., Castro, P.
173	Geotechnical and Operational Assessment of an Extended Transverse Sublevel Stope at Aripuanã Mine	Rocha, L.
174	Sustainable Design and Construction of Ash Dyke Using Geosynthetic Materials	Mauriya, V.
175	AI-Enabled Geotechnical Engineering Workflows: Integrating Site Investigation, Analysis, Optimization, and Automated Reporting Using Rocscience Software	Pishgah, P., Javankhoshdell, S.
176	Multi-Encoder Surrogate Models for Simulated Site Amplification in Central and Eastern North America Conditioned on Site Natural and Higher-Mode Periods	Sulaiman, A., İLHAN, O., Centella, D., Hashash, Y.
177	Developing a Pit-Scale GSI Model Through Standardised Drone Mapping and Geotechnical Practitioner Validation	Rajcoomar, H., Paredes, P., Aguilar, A.
178	Explainable Artificial Neural Network for Predicting the Shear Strength Parameters of Sandstone: An Interpretable Data-Driven Approach.	Manohar, B., Gondu, V.
179	Grain-Size Control of Crack Initiation and Fracture Localization in Granite: A GB-FDEM and PCA-Based Analysis	Alizadeh, P., Hekmatnejad, A.
180	Back-Analysis of a Slope Failure Using Slide2 and RS2: Comparison Between Limit Equilibrium and Shear Strength Reduction	Ribeiro Dib, T., Altoé Bissoli, I., Bretas, T., Furtado, T.
181	Prediction Intervals for Correlations Between Rock Mass Classification Systems	Llanos, F., Lledó Araya, P.
182	Three-Dimensional Slope Stability Analyses: Combining LEM, DEM and FDM for a Mining Project.	Lledó Araya, P., Llanos, F.
183	Effect of Strength Parameter Uncertainty on Tailings Dam Stability	Ribeiro Dib, T., Altoé Bissoli, I., Bretas, T., Cabral, G., Neto, A.
184	Equipment Surcharge Loads and Induced Vibrations for Slope Stability Analysis	Ribeiro Dib, T., Altoé Bissoli, I., Bretas, T., Cabral, G.
185	A Heightfield Terrain Boundary for SPH Landslide Runout: Contact, DBC Layers, and Predicted-Position Clamps	Azami, A.
186	A Scalable, Reproducible Automation Framework for Back Analysis in RS2 (Rocscience's 2D FEM Tool): A Case Study of a Retaining Wall (Part 1)	Azami, A.
188	An Optimized, Scalable, Reproducible Automation Framework for Back Analysis in RS2 (Rocscience's 2D FEM Tool): A Case Study of a Retaining Wall (Part 2)	Azami, A.

189	Erodible-Bed Entrainment in SPH Landslide Runout: Particle Activation Coupled to an Adaptive Terrain Boundary	Azami, A.
190	SoftStart: A Required Initialization Feature for SPH Runout Analysis	Azami, A.
191	Generalized Anisotropic Model: Theory and Verifications on Material Tests, Slope Stability, and Bearing Capacity	Azami, A.
192	Taking a 3-D Fabric Into a 2-D Slope Section: The Influence of Out-Of-Plane Joint Dip on Factor of Safety	Azami, A.
193	On the Reliability of the Factor of Safety of Tailings Dams in the Presence of Liquefiable Material	Azami, A.
194	Rainfall-Induced Instability of Tylorstown Tip: Limit Equilibrium and FEM-SSR	Azami, A.
195	On the Importance of a Curved Failure Envelope in Slope Stability Analysis	Azami, A.
196	Deformation-Driven Active–Passive Wedges and Combination Failure Modes: Reading More Than One Factor of Safety	Azami, A.
197	Quantifying Combustion-Induced Factor of Safety Variation in Coal Highwalls Across Geometries Using Gaussian Process Regression	Mendez, L., Torres, A.
198	Anisotropy and Relict Joint Control on Slope Stability in Tropical Granitic Residual Soils	Mohamad Ismail, M.
199	3D Seepage Modeling of Large-Scale Tailings Dams: A Case Study of a Major Storage Facility Under Operational Conditions and Extreme Events	Llamocca, J., Valdivia Carbajal, J., Pérez, F., Sierra, J.
200	Settlement in Layered Soils: A Benchmark of Boussinesq, Multiple-Layer Elasticity, and Continuum FEM	Azami, A.
201	From Liquefaction Trigger to Deposit: An Rs2/3–Slide2/3–RSRunout Workflow for Tailings Dams	Azami, A.
203	Assessment of Top-Cap Tilting Restraint in Direct Shear Tests on Ipanema Beach Sand, Rio De Janeiro, Brazil	Juliette Barbosa Fernandes, C., Aguiar, V., Domingos, G., Simoes, F.
204	Seasonal Hydrological Forecasting for Proactive Mine Water Management	Erler, A., Frey, S., Ma, A., Pugsley, W., Khader, O., Hah, D.
205	Machine-Learning-Based Hydrological Prediction for Data-Sparse Mining Regions	Erler, A., Frey, S., Hah, D., Ma, A.
206	A Comparison of MPM and SPH for Post-Failure Landslide Behaviour: The 2017 Mud Creek Landslide	Zhou, H., Kazimierczak, M., Corkum, B.
207	A Multi-Agent AI System for Stability Assessment of Tailings Storage Facilities — the Żelazny Most Case Study	Stefaniak, P., Koperska, W., Stachowiak, M., Bajerowicz, A.
208	Continuous Geotechnical Monitoring of Tailings Storage Facilities Using Spectral Ground-Penetrating Radar Supported by Ai/ml Data Interpretation	Trzesniowski, M., Stefaniak, P., Bajerowicz, A., Koperska, W., Stachowiak, M.
209	Machine Learning Methods Supporting Stability Assessment of a Tailings Storage Facility: A Digital Representation of the Żelazny Most Dam	Stachowiak, M., Koperska, W., Stefaniak, P., Skoczylas, A.
210	Numerical Investigation of Discontinuity-Controlled Fracture in Jointed Sandstone Under Tensile and Mode I Loading	Srivastava, A., Guha Roy, D., Prakash, P.
211	What's in a Word? Preserving the Semantic Meaning of Geotechnical Data Using AI-Powered Vector Embeddings	Yang, B., Dogan, Y., Chai, S., Hammah, R., Hashash, Y., Corkum, B.
212	Pillar Behavior Between Two Caverns and Simplified Factor of Safety Estimation	Martin, W.
213	Rapid Probabilistic Prediction of Progressive Rock-Block Failure Via Universal Discontinuity Index	Hekmatnejad, A.

214	Brief Study of Creep Parameters from the Brazilian Test in Halite	Viana da Silva, G., Dantas de Medeiros, C., Cavalcanti, M., Nahas Ribeiro, W., Jordan Ibanez, G.
215	A Risk-Based Methodology for Geotechnical Monitoring System Design	Vásquez Maya, M.
216	Avaliação Numérica Da Estabilidade De Taludes Submetidos Ao Rebaixamento Rápido: Comparação Entre Abordagens Simplificadas E Análise De Fluxo Transiente	Limeira Torres, T., Santos, G., Gabriela Alves de Arruda, M., Ferreira, V.
217	From Geotechnical Engineering to GeoSTEM Education	Vásquez Maya, M.
218	Comparison of 2D and 3D Stability Analyses of Coastal Cliffs	de Souza Batista, V., Medeiros da Silva, P.
220	Design of a Large-Scale Foundation Using Theoretical and Numerical Methods Under Different Loading Conditions	Morais de Souza, L., Silva, L., Guimarães, G., Cavalcanti, M.
221	From Common Errors to Best Practice: A Guideline for Geotechnical Parameter Collection and Data Validation in Core Logging	Ramirez, C., Russo, A.
222	Structural Assessment of Major Faults and Their Inclusion in a Geotechnical Block Model	Russo, A., Ramirez, C., Troncoso, P., Hormazabal, E.
223	Joint Effects of Ore Type, Material Segregation, and Lake Location on the Stability of Upstream Tailings Dams	Alizadeh, P., Hekmatnejad, A.
226	Sensitivity of Slope Stability Results to Modelling Settings: A Slide2 and RS2 Case Study on an Urbanised Slope	Gabriela Alves de Arruda, M., Santos, G., Limeira Torres, T., Ferreira, V.
227	From Factor of Safety to Probability of Failure	de Souza Batista, V., Medeiros da Silva, P.
228	3D Back Analysis of a Coastal Cliff Failure	de Souza Batista, V.
230	Cascading Slope Failures in Coastal Cliffs	de Souza Batista, V., Medeiros da Silva, P.
232	Empirical-Probabilistic Runout Assessment of Waste-Rock Dump Failures	Neto, A., Bretas, T., Bueno, Z., Guimarães de Carvalho, L.
233	Machine Learning-Based Prediction of Shear Strength Parameters of Weathered Materials Derived from the Cauê Formation, Brazil	de Souza Batista, V., Medeiros da Silva, P.
234	Comparative Analysis of Sheet Pile Design	Ferreira, V., Gabriela Alves de Arruda, M., Santos, G., Limeira Torres, T.
235	A Unified Finite Element Framework for 1D Effective-Stress Seismic Site Response Analysis Under Multidirectional Shaking	Centella, D., Hashash, Y.
236	Benchmarking I-soil and PM4Sand3D for Effective Stress Seismic Site Response and Liquefaction Analysis	Centella, D., Hashash, Y.
237	Effect of Progressive Floor Addition on Urban Slope Stability: Incremental Load Analysis and Engineering Solutions Using Slide2	Santos, G., Gabriela Alves de Arruda, M., Limeira Torres, T., Ferreira, V.
238	Rockfall Hazard Assessment for Critical Infrastructure Protection: A Sensitivity Analysis of Block Geometry, Terrain Conditions, and Energy Dissipation Mechanisms	Segura Bidermann, C., Martinez Silva, G., Villouta, A.
239	From Data Interpretation to Model Results in Rock Mechanics	Suzuki Morales, K., Mery, N., Jarufe Troncoso, J., Salazar Jeria, T.
240	Numerical Analysis Assessment of CO2 Storage in Cavities Within the Evaporite of the Campos Basin	Cavalcanti, M., Gomes, I., dos Santos Moura, M.
241	Hydromechanical Analysis of the Influence of the Water Table on Excavation Stability: A Comparison Between RS2 and Slide2	Limeira Torres, T., Ferreira, V., Santos, G., Gabriela Alves de Arruda, M.
242	Assessment of Two Tunnel Advance Modelling and Simulation Techniques for Convergence Confinement: Case Study in Minas Gerais, Brazil	de Abreu Henriques, D., Silva, N., Porto, R., Yoda, A., Dimitrov, G.

243	Integrated Stability Assessment for Open-Pit Slope Optimization	Adriano Rocha, L., Ribeiro Bueno, Z.
244	Influence of Longitudinal Displacement Profile Formulations on the Performance of a Shallow Mining Tunnel	de Abreu Henriques, D., Silva, N., Porto, R., Yoda, A., Dimitrov, G.
245	Evaluation of Displacements in Mechanically Stabilized Earth Wall Using 2D Stress-Strain Model	Cabral, G., Bretas, T., Silva, A., Figueredo, A., Ribeiro Dib, T.
246	Feasibility Assessment of 20 M-High Rock Slopes in a Structurally Controlled Open Pit Integrating Field Mapping, Photogrammetry, and Probabilistic Block-Stability Analysis	Bretas, T., Silva, S., Guimarães de Carvalho, L., Moreira, H., Queres, V., Neto, A., Ribeiro Bueno, Z.
248	Static Liquefaction Assessment of Blended Sandy Tailings	Drumond, A., Gabriel, G., Marques de Oliveira, M., Monteiro Miranda, C., Silva de Moraes, D., Salvador, C.
249	2D Multicriteria Geospatial Modelling for Riverbank Geotechnical Susceptibility Assessment	Neto, A., Gurgel, J., Bretas, T., Gurita, R., Passos, S., Cabral, G., Ribeiro Dib, T.
250	Runout Back-Analysis of a Highway Slope Failure	Neto, A., Bretas, T., Furtado, T., Silva, A., Rocha, L., Guimarães, P.
251	Safety Analysis of Dams in the Iron Quadrangle Region Under Historical Brazilian Earthquakes Using the Newmark Methodology	Cabral, G., Bretas, T., Furtado Cota, T., Silva, A., Neto, A.
252	Combining 3D and 2D Limit-Equilibrium Analyses Supported by a Geotechnical Block Model for Slope Stability Assessment	Lopes Lanna, C., Marques, E.
253	Methodological Comparison of Overload Application in Two-Dimensional and Three-Dimensional Modeling	Cabral, G., Bretas, T., Ribeiro Dib, T., Silva, A., Henrique, P.
255	Three-Dimensional Modeling for Earthwork Mass Balance in Highway Projects: Quantification of Excavation Volumes by Material Category	Furtado, T., Bretas, T., Neto, A., Rocha, L., Naves, H., Guimarães, P.
256	Numerical Comparison of Seismic Response Analysis Using RS2 and RSSeismic for Tailings Storage Facilities	Ninanya de la Cruz, A., Ninanya De la Cruz, H., Antonel Fabbri, H., Romanel, C.
257	Integration of UAV-Based Photogrammetry and Rockfall Back Analysis for Slope Hazard Assessment in an Open Pit Mine	Dogan, Y.
258	Application of Digital Photogrammetry for Enhanced Accuracy and Kinematic Assessment in Underground Structural Surveys	Alves, C., Oliveira, M., Santos, T., Martins, F., Pereira, M., Lemos, L.
259	Influence of Cross-Correlation Between Hydraulic Conductivity and Soil Strength on Probabilistic Slope Stability Under Transient Hydraulic Conditions	Baninajarian, L., Javankhoshdel, S.
260	A Case Study of Three-Dimensional Rock Slope Failure Modelling and Ground-Support Optimisation Using Slide3	Mirabedini, R.
261	Slope Stability Study in an Iron Ore Mine	Morais Avelar Álvares, A., Arnt Abichequer, L., Cordova, D.
263	Framework Digital Twin Para Monitoramento Geotécnico Preditivo E Gestão De Riscos Em Operações De Mineração	Correia, Y.
264	Modelling of the Mechanical Behaviour of Orthotropic Geomaterials	Przecherski, P., Pietruszczak, S., Moallemi, S., Azami, A.
