

Updating Your Local License Key

These instructions are for **local licenses**. The License Key Update must be performed on the **machine currently hosting your licenses**.

It is important to complete all required license key updates. Missing an update may cause issues when your licenses are updated or cancelled in the future.

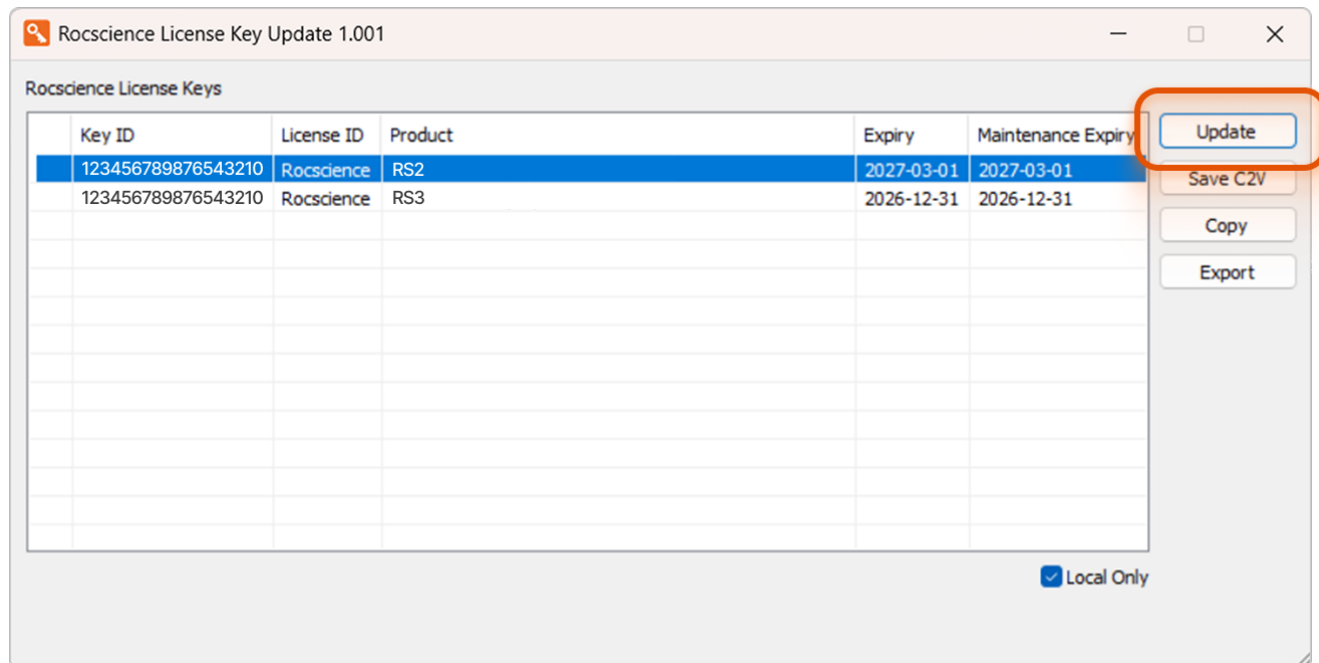

1. Download [LicenseKeyUpdate.zip](#) on the machine currently hosting your local licenses.
2. Locate the downloaded **LicenseKeyUpdate.zip file**, right-click it, and select **Extract All**. Choose the location where you would like to extract the files and click **Extract**.
3. Open the extracted folder and double-click **LicenseKeyUpdate.exe** to open the License Key Update utility.
4. Make sure **Local Only** is selected at the bottom-right of the utility, as shown in **Figure 1**.

- [Figure 1]

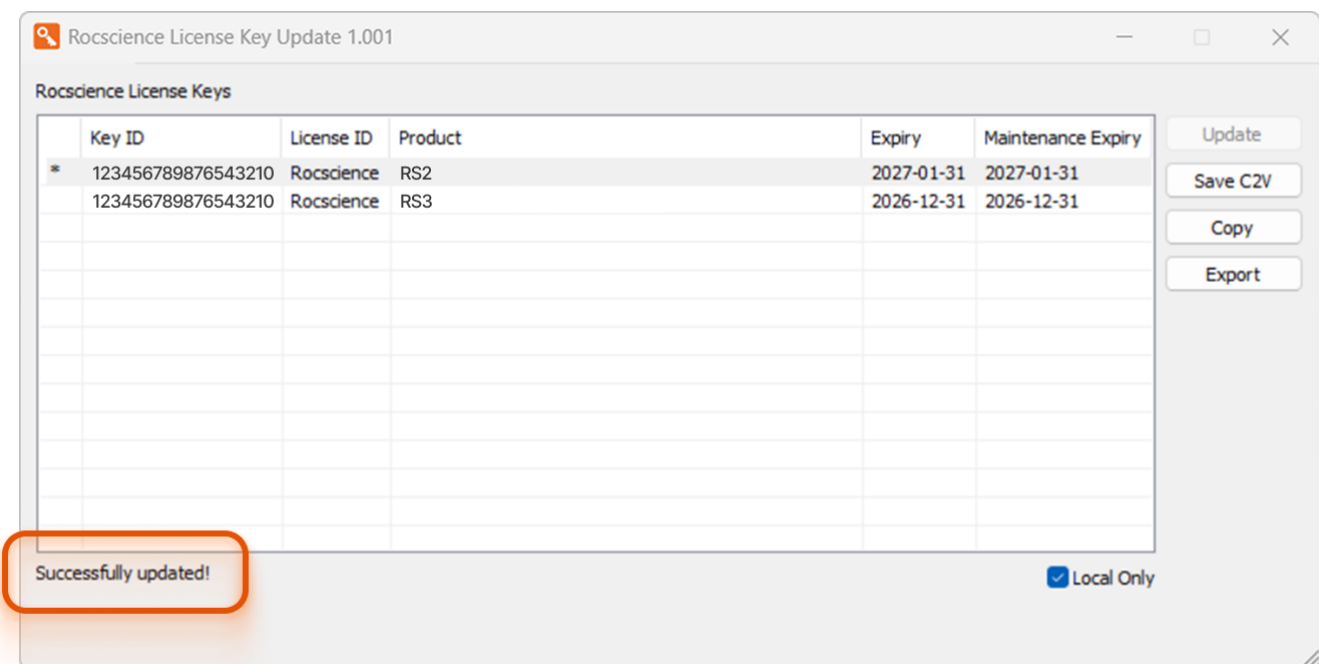

5. Select the **license key** you want to update, as shown in **Figure 2**, and click **Update**.

- [Figure 2]

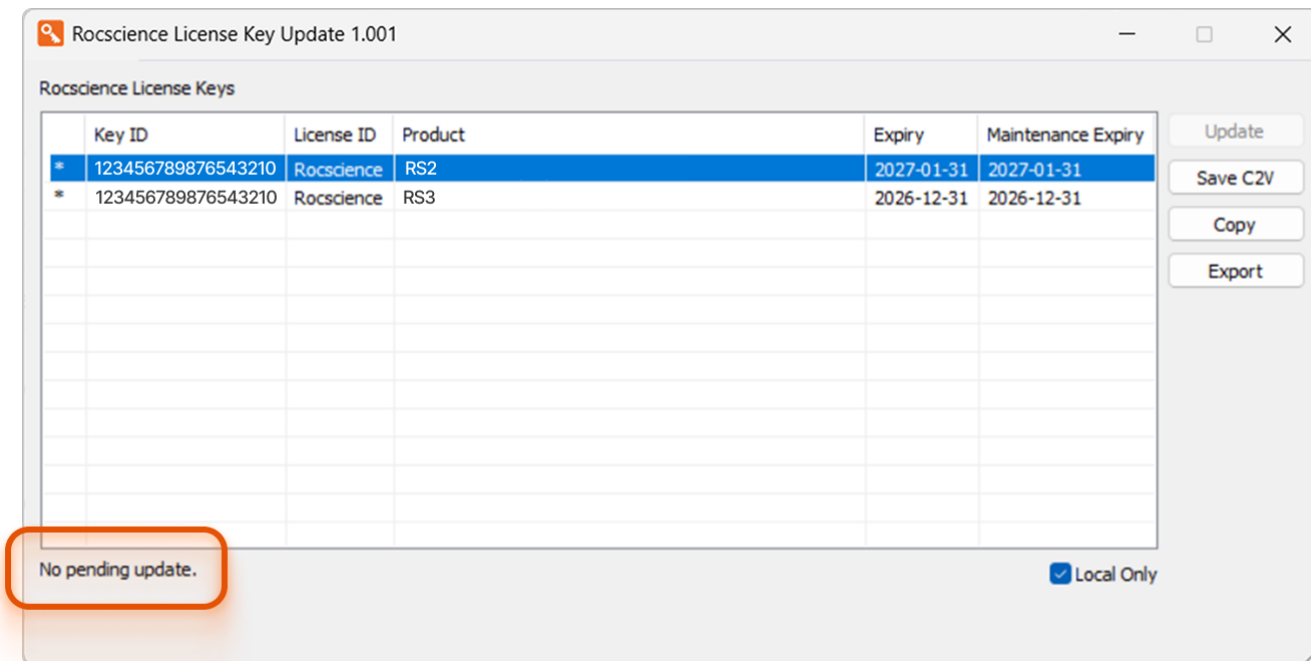

6. After clicking **Update**, one of the following messages will appear:

- Figure 3: "Successfully updated!"-The license update was completed successfully.

- Figure 4: "No pending update."-No updates are currently available for the selected license.

7. If you receive an error message during the update, please send us the error details and a screenshot for troubleshooting.

Important: The License Key Update must be performed on the machine currently hosting your local licenses.
